

<p><u>Incorporated Sealing</u></p> <p>Professional co-extruded sealing incorporated in profile products.</p>	
<p><u>FEP O-Ring with</u></p> <p>High Performance sealing extreme long term use. Suitable for exposed use in e.g. guide sleeves or telescopic sleeves. Good gas permeation resistance and pressure tightness.</p>	
<p><u>Cellular Rubber</u></p> <p>Foam rubber sealing suitable to allow big product tolerances for pipe applications with limited chemical resistance requirements.</p>	
<p><u>NBR O-Rings</u></p> <p>Economic o-ring sealing in different shore hardness classes and colors for pipe sockets.</p>	
<p><u>EPDM Sealing</u></p> <p>Spacer sealing for civil engineering.</p>	
<p><u>Flat gasket</u></p> <p>Standard flat gasket for free flow pipe connections with stub ends / flanges.</p>	
<p><u>Profile Flat Gasket with Steel Core</u></p> <p>Advanced flat gasket for pressure pipe connections with stub ends / flanges.</p>	

<p><u>Hypalon Boot Sealing Colored</u></p> <p>Flexible uv-resistant long term sealing in white color for exposed pipe connections. Fixation with HDPE coated steel strings.</p>	
<p><u>Neoprene Boot Sealing Black</u></p> <p>Flexible uv-resistant long term sealing in black color for exposed pipe connections. Fixation with HDPE coated steel strings.</p>	
<p><u>Manhole Shaft Pipe Transition Sealing</u></p> <p>Pressure resistant sealing between shaft concrete and PE pipe</p>	
<p><u>Gap Chain</u></p> <p>Gap chains with steel core to seal gaps between inner pipe and concrete guide holes. Tightening by incorporated screw bolts.</p>
