

<p><b><u>Material Choice</u></b></p> <p>Professional material know how for best and economical material choice for your product</p>	
<p><b><u>Product Design Choice</u></b></p> <p>Professional support in product design considering economical material weight, feasible tolerances, possible production processes and easy handling and installation,</p>	
<p><b><u>Product Sealing Choice</u></b></p> <p>Professional sealing know how for your product according the application</p>	
<p><b><u>Static Calculation</u></b></p> <p>Professional FEM static calculations considering the special plastic e-modulus changes in temperatures as well as the individual application requirements.</p>	
<p><b><u>CAD Drawings</u></b></p> <p>Professional CAD drawings of products, production tooling and installation plans</p>	
<p><b><u>Repair Solutions</u></b></p> <p>Professional solution know how for repair applications of plastic products and systems</p>	
<p><b><u>Products Tests</u></b></p> <p>Professional products tests non destructive or destructive</p>	

<p><b><u>TV Inspection</u></b></p> <p>TV inspections to check pipeline damages of all kind of pipeline materials</p>	
<p><b><u>Pipe Neutralisation/Disinfection</u></b></p> <p>Pipe neutralisations after pipe work prior pipeline use for drinking water</p>
