

<p><b><u>Push Fit Coupler</u></b></p> <p>Push fit coupler for fast and easy connection including longitudinal force lock grip. Available for pressure and non pressure pipes. High price and non detachable.</p>	
<p><b><u>Flange connection</u></b></p> <p>Stub end fittings are welded to the pipes and backing rings/flanges are fixed with bolts. Available for pressure and non pressure pipes. High price. Detachable solution.</p>	
<p><b><u>Screw Coupler</u></b></p> <p>Screw coupler for fast and easy connection with limited longitudinal force lock properties. Available for pressure and non pressure pipes. High price. Detachable solution.</p>	
<p><b><u>Shrink Pipe</u></b></p> <p>Shrink pipe is heated to the pipe ends for connection. Recommended for non pressure pipe applications. Limited longitudinal force lock properties. Fair price. Non detachable.</p>	
<p><b><u>HDPE steel transition</u></b></p> <p>Fitting needs to be weld to both pipe materials. Perfect longitudinal force lock properties. Available for pressure and non pressure pipes. Very high price. Non detachable.</p>	
<p><b><u>Steel Grip Coupler</u></b></p> <p>Connection of HDPE pipes to other materials. Recommended for repair work and low pressure applications. Limited longitudinal force lock properties. High price. Detachable.</p>	
<p><b><u>Sockets</u></b></p> <p>Sockets for fast and easy pipe connections. Available for HDPE to other pipe material. Recommended for low pressure applications. Fair price Detachable.</p>	

<p><b><u>Thread Connection</u></b></p> <p>Connection of HDPE pipes to other materials. Recommended for low pressure applications. Good longitudinal force lock properties. High price. Detachable.</p>	
<p><b><u>Electrofusion Coupler Steel Thread Connection</u></b></p> <p>Connection of HDPE pipes to other materials. Available for high pressure applications. Perfect longitudinal force lock properties. High price. Detachable.</p>
