

<p><u>Stub End</u></p> <p>Standard stub end for all kind of backing ring materials. Available in SDR 7 – 33 class.</p>	
<p><u>PP – ST Backing Ring</u></p> <p>PP coated steel backing ring for long term corrosion tightness.</p>	
<p><u>Fix Flange</u></p> <p>Advanced HDPE flange connection without backing ring for long term corrosion tightness.</p>	
<p><u>HP Flange</u></p> <p>Advanced flange technology for reduced coupler deformation under high pressure. Full axial stub end force transmission including radial support by special design.</p>	
<p><u>HT Flange</u></p> <p>Advanced flange technology for best tightness of standard pressure pipe by stub end incorporated o-ring sealing. PP coated backing ring.</p>	
<p><u>Coned HDPE Flange Coupler</u></p> <p>Advanced corrosion tight HDPE flange connection.</p>	
<p><u>Quick Release Coupler</u></p> <p>Advanced steel coupler for multiple use for mining pipelines or temporary pipe connections</p>	

Installation Adaptor

Detachable flange connection suitable for pipeline monitoring, cleaning and maintenance.
