

<p><u>External Spiral</u></p> <p>External double spiral extruded with the pipes to eliminate 'rain/wind' induced cable vibrations.</p>	
<p><u>Internal Helix</u></p> <p>Internal helix extruded with the pipes for spacer function to ensure strand bundle centralizing during grouting or to limit cable vibration sounds.</p>	
<p><u>Metallic Effect Colored NOCX Pipes</u></p> <p>NOCX pipes with identical weathering-protections with metallic effect colors</p>	
<p><u>Tempered Pipes</u></p> <p>Pipe tempering for specified material relaxation to avoid the normal effect of pipe end size reduction after production to provide advantage on buttwelding connections.</p>	
<p><u>External Spiral and Internal Helix</u></p> <p>Both technologies available in combination.</p>	
<p><u>Longitudinal Rib</u></p> <p>Customized pipes with e.g. longitudinal ribs to guide, direct or fix internal pipe items available</p>
