

## Twin Wall Pipe

## Twin Wall Pipe Technical Data

Twin Wall pipe corrugated outside and smooth wall inside available in HDPE or PP with ring stiffness of 3,15 kN/m2 for Type 1 and 8,00 kN/m2 for Type 2 both suitable for all kind of drainage application e.g. highways, single track roads, fields, construction areas or preferred use in 3-5 m ground depth without heavy traffic loads for Type 1 and with heavy raffic loads for type 2 Orainage of e.g. highways, fields, landfill, single track roads, construction areas, Sewage, DIN 4262 part 1, British TWPA, British BRF Ring stiffness according ISO 9969 is 3,15kN/m2 for Type 1 and 8,00 kN/m2 for Type 2 • Non perforated • Top perforated, 220° with 15% open area(>50 cm2/m) for water intake • 360° perforated • Available ID/OD pipe sizes in mm Type 1 100/120, 150/177, 200/232, 250/289, 300/345, 350/398 Type 2 200/225, 250/282, 300/339, 400/452, 500/565, 600/679, 800/906, 1000/1134
Sewage, DIN 4262 part 1, British TWPA, British BRF Ring stiffness according ISO 9969 is 3,15kN/m2 for Type 1 and 8,00 kN/m2 for Type 2 Non perforated Top perforated, 220° with 15% open area(>50 cm2/m) for water intake 360° perforated Available ID/OD pipe sizes in mm Type 1 100/120, 150/177, 200/232, 250/289, 300/345, 350/398
Ring stiffness according ISO 9969 is 3,15kN/m2 for Type 1 and 8,00 kN/m2 for Type 2 Non perforated Top perforated, 220° with 15% open area(>50 cm2/m) for water intake 360° perforated Available ID/OD pipe sizes in mm Type 1 100/120, 150/177, 200/232, 250/289, 300/345, 350/398
<ul> <li>Non perforated</li> <li>Top perforated, 220° with 15% open area(&gt;50 cm2/m) for water intake</li> <li>360° perforated</li> <li>Available ID/OD pipe sizes in mm</li> <li>Type 1 100/120, 150/177, 200/232, 250/289, 300/345, 350/398</li> </ul>
<ul> <li>Top perforated, 220° with 15% open area(&gt;50 cm2/m) for water intake</li> <li>360° perforated</li> <li>Available ID/OD pipe sizes in mm</li> <li>Type 1 100/120, 150/177, 200/232, 250/289, 300/345, 350/398</li> </ul>
Type 1 100/120, 150/177, 200/232, 250/289, 300/345, 350/398
Available length up to 12000 mm
<ul> <li>High durability and expected service life of 100 years</li> <li>Perfect pipe elasticity can react to environment soil settlements</li> <li>Neglect able minor axial pipe extensions due to pipe profile acting as an anchor soil</li> <li>Perfect deformation stability performance due loads are diverted to pipe surrounding soil</li> <li>Low maintenance and cleaning costs</li> <li>Safe and field approved pipe system</li> <li>Safe and perfect joint tightness</li> <li>Best chemical resistance</li> <li>Best mechanical resistance (abrasion and impact resistance, low fractures)</li> <li>Best hydraulic due to smooth inner surface. No infiltration or exfiltration, no root penetration</li> <li>High flexibility</li> <li>Easy to handle (low weight)</li> <li>High temperature resistance (-40°C to +80°C)</li> </ul>
ntegrated Socket/spigot with EPDM rubber sealing
Preferred installation depth 3-5 m without heavy traffic loads and without ground water
High Density Polyethylen Grade PE 80 color black acc ASTM D 3350 PE 345444 C, DIN 8075
and BS 6437
And BS 6437 All kind of fittings e.g. bends, tees, flanges, stub ends, manholes, shafts, transitions
